

ROPE BRAKE

WRB 1

EXCELLENCE IN COMPONENTS

ROPE BRAKE

WRB 1

FEATURES

- suitable for lifts according to European Lift Directive 95/16/EC, EN81 and TRA 200
- suitable for lifts with rated load up to approx. 1000 kg and a nominal speed up to 2,61 m/s at 1:1
- covers a rope distance (out-to-out) of 125 mm and rope diameters of 8 mm to 13 mm
- high security factor as a result of additional mechanical release by bowden cable at the overspeed governor
- less effort for control engineering to integrate the rope brake into lift system, because the reset to starting position doesn't need an additional supervised device
- very suitable for modernization of lifts
- less effort for connection to lift controller
- less effort for assembly and maintenance
- fast and easy replacement of the brake linings

Swivelling range $\pm 35^\circ$
